# Tree of Life Preschool

## at Congregation Kol Shalom

1909 Hidden Meadow Lane, Annapolis, MD 21401 [www.kolshalomannapolis.org](http://www.kolshalomannapolis.org)

### Nature Playspace for learning and growing

The **Tree of Life Preschool** connects young children to G-d through the wonders of nature and creation.

Each week we will learn, through art, science, and play, how these aspects of nature are connected to our lives and our Jewish traditions.

All children are welcome to our programs.

## SUMMER CAMP at our nature playspace

Four Camp Weeks running 9am – 1pm

Aftercare until 4pm is available

Ⓢ June 14 – June 17

Ⓢ June 20 – June 24

Ⓢ July 18 – July 22

Ⓢ July 25 – July 29

Children ages 4 - 8years - 9:00am – 1:00pm

All weeks run independently; join us for the dates of your choice. We provide drinks and fruit; children bring a dairy lunch and snack.

To register: contact Allison Charapp at 410-266-6006 or [Allison@kolshalomannapolis.org](mailto:Allison@kolshalomannapolis.org)

COST: \$200 per week for camp  
+\$100 per week for aftercare until 4:00pm

To register, contact Allison Charapp at [Allison@kolshalomannapolis.org](mailto:Allison@kolshalomannapolis.org) or 410-266-6006.

Join us for our flagship summer filled with great play and new friends! Debra Soreff, a long time Annapolis-based artist and teacher, will be leading our weekly camps. Her artwork with children is beyond crafts – working with natural materials such as ceramics and natural paints allows the children to express themselves creatively. Science at our nature playspace is geared towards all levels due to its truly experiential nature, allowing each child to learn and grow at their own pace.

## Playing Wild in the Wilderness!

June 14 – June 17

A whole week looking at animals and their lifestyles! All around us are clues about how animals live and where they go when we aren't looking! We will learn about animal adaptations, their tracks, ecosystems, the food chain, and interactions with other animals. Every day will include art, science, and creative play!

## Prelude to National Mud Day!

June 20 – June 24

National Mud Day is not enough... So, we are offering a week of studying MUD! We will play with it, make it, learn about it, and even make a Mississippi Mud Cake for snack (real food!)! The week will be dedicated to the sensory overload of this amazing life-sustaining substance found only on Earth!

## Growing Plants Up to Here!

July 18 – July 22

This week is dedicated to appreciating the importance and beauty of plants! Each day through art, science, and exploration, we will learn about the life cycle and work of plants! Printing, sculpting, natural material brushes, and nature hunts throughout our property will all be part of our fun!

## Water Cycles Everywhere!

July 25 – July 29

Earth is the only place we know of that has water in all three forms – solid, liquid, and gas! This is the week to look at all of them and experiment with play, art, and science to enjoy this environmental gift! Our nature playspace offers opportunities to play with water, and our yard will be filled with even more discoveries!
